CAREER SUMMARY

Senior Software Quality Assurance Analyst and Automation Engineer with 6+ years of experience across web, mobile, and desktop platforms. ISTQB CTFL v4.0 certified. Expert in SDLC/STLC methodologies within Agile and SAFe environments. Proven track record in building robust UI and API automation (using tools like Playwright, Selenium, and Postman) integrated into CI/CD pipelines, alongside deep backend data validation using SQL and foundational web security testing, including OSINT. Dedicated to driving efficiency by leveraging AI-augmented workflows to accelerate test case generation, streamline scripting, and maximize testing coverage.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C++.
Frameworks: Laravel, Node.JS, Selenium (BDD), Playwright (Python).
Tools: Mabl (automation tool), Postman (API), JMeter, Jinja 2.
AI Tools: Claude Code, Gemini Pro, ChatGPT, Llama, etc.
Databases: Microsoft SQL Server 2017, MySQL, RDS, Amazon Redshift.

WORKING EXPERIENCE

Quality Assurance Analyst – Mercury IT (Veradigm) July 2024 – Present
US Remote/Dhaka On-Site

- **US Healthcare Domain Expertise:** Worked extensively with Medicare, Medicaid, EDGE, and HIPAA-compliant healthcare systems.
- **Claims Processing Validation:** Tested Medical, Pharmacy, Dental, and Enrollment claims workflows, including medical billing and coding rules.
- **Backend Database Testing:** Conducted in-depth SQL database testing to validate claims data accuracy and ensure transaction integrity using RDS and Amazon Redshift.
- **Test Automation & Efficiency Improvement:** Developed automation scripts to generate CMS response files from EDI 837 inputs, reducing response file generation time and improving overall team efficiency. Tools used: Playwright, Python, Jinja.
- **Ownership & Delivery:** Took end-to-end ownership of assigned features and ensured successful, on-time delivery to the client through thorough QA validation.
- **AI Involvement:** Using AI to deliver regular tasks faster and more efficiently. Integrated AI tools to accelerate daily workflows (bug reporting, document analysis, test case/data preparation) and configured a local offline AI environment capable of text and image processing.
- **Scrum Master & Lifecycle Management:** Acted as Scrum Master, facilitating daily stand-ups and sprint retrospectives within a Scaled Agile Framework (SAFe).

SQA Engineer – Kaz Software December 2020 – June 2024
Dhaka, Bangladesh

- **Manual & Automation Testing:** Performed manual testing and automation using Java Selenium BDD (Cucumber) and Mabl for web applications.
- **CI/CD & DevOps Integration:** Integrated automation with Jenkins, and worked with Azure DevOps and TeamCity CI/CD pipelines.
- **Test Planning & Execution:** Conducted business/requirement analysis, prepared test plans, wrote, modified, executed, and maintained test cases.
- **API & Backend Testing:** Performed API testing using Postman, Swagger, and REST Assured (Java); validated data from databases.
- **Performance Testing:** Participated in load testing using JMeter as a team member.
- **Cross-Platform Testing:** Tested cross-browser, mobile apps (Android/iOS), and desktop applications (Windows/Linux/macOS).
- **Tools & Project Management:** Worked with JIRA, YouTrack, GitHub, GitLab, and Trello for defect tracking and project coordination.
- **QA Ownership & Collaboration:** Handled projects independently as the sole QA and assisted developers with efficient bug reproduction paths.

Software Quality Assurance Engineer (Intern) – NYK Advance, Max Group January 2020 – August 2020
Dhaka, Bangladesh

- Solved programming-related problems while doing automation.
- Wrote test cases for an ERP system.
- Conducted Manual and Automated testing of an ERP System.
- Completed Automation with Java Selenium BDD framework and JavaScript-based Selenium.
- Familiar with TestNG, Maven, Cucumber, JavaScript (Automation), JIRA, Trello, Slack, GitHub, etc.

KEY PROJECTS

US Healthcare Claim Submission - DTS (Data Transmission System)

- Medical Claim (Medicare, Medicaid & EDGE).

- Full cycle of claim submission through the response processing system.

Deven Software (Mergers & Acquisitions - M&A)

- Automated regression test matrix and critical test scenarios using Mabl. Performed regression, smoke, sanity, end-to-end, and database validation testing.
- Maintained and expanded regression coverage for newly developed features in an Agile environment using Azure DevOps, YouTrack, TeamCity, and Jira.

UPay (Digital Financial Services - UCB Fintech Company Ltd.)

- Executed basic verification flows initially for web portals and customer & agent mobile applications.
- Authored and executed test cases and prepared comprehensive test execution reports.

Gateway to Access (Language & Technology Solutions)

- Conducted audio/video call testing, live chat testing, and API testing using REST Assured.
- Communicated with clients to clarify requirements and ensure correct development direction.

WTA - World Tax Analyzer

- Conducted manual and automated testing using Selenium BDD framework.
- Integrated automation with Jenkins CI/CD and performed regular regression testing.

TPA - Transfer Pricing Analyzer

- Performed comprehensive manual testing to validate business functionality.

Roboket (CRM - ADN Diginet Ltd.)

- Executed regression, smoke, and sanity testing along with API testing using Swagger.
- Presented application progress and quality status directly to the client.

AARONG (E-commerce - Lifestyle Retail Chain)

- Participated in load testing using JMeter and performed regression testing.
- Conducted API testing using Postman.

CERTIFICATIONS & TRAININGS

- **ISTQB® Certified Tester Foundation Level (CTFL v4.0)** - 85%
Fundamentals of testing, STLC, Static testing, Test analysis and test design, Managing the test activities, Test Tools.
- **Health Insurance Portability and Accountability Act (HIPAA)**
PHI Protection, Privacy & Security Rules, Risk Assessment, etc.
- **Ready for SAFE**
- **Generative AI for Everyone**
Generative AI tools and how it works, RAG, MCP, AI strategy for work and business, AI productivity, AI beyond prompting, etc.
- **SQA Capture the Flag (CTF) 2026 (Rank #9 of 79)** - Bangladesh Aspiring QA Community (May 2026)
Challenges spanning Web Security, OSINT, AI Prompting, and Test Automation.

EDUCATIONAL QUALIFICATION

American International University-Bangladesh (AIUB) • Dhaka, Bangladesh
Bachelor in Computer Science and Software Engineering (CSSE) • CGPA: 3.46 out of 4.00

April 2020
